

# CONTOUR Cubicles

## An enclosed showering area, easily fitted into almost any room

A shower cubicle is the simple option when a showering solution is required with the minimum amount of installation and disruption to existing services.

A cubicle can be located up or down stairs, and as full cubicles required no tiling, they can be easily relocated if required.

The addition of grabrails, shower seat or a wash hand basin will provide a functional solution for individual requirements.

- Provides a short term alternative, or ideal as an enclosed showering area
- Simple to install, shower tray and enclosure can be easily installed up or down stairs
- Full enclosure can be used in any room with the minimum amount of installation and disruption, and can be relocated if required
- Glazed with polypropylene. This material is white and indestructible, it exceeds any classification and is suitable for the most demanding situations
- Shower tray has an anti-slip surface providing an assured under foot grip
- Lifetime guarantee
- Shower doors can be glazed in either PET or polypropylene.
- Cubicle height, 1850mm. Half height doors manufactured at 750mm as standard
- Shower trays exclusively incorporate Microban® antibacterial protection which actively inhibits the growth of harmful and odour causing bacteria
- Left or right hand options available

Cormorant E with WC LH illustrated

A cubicle can be used on the following flat top tray's:

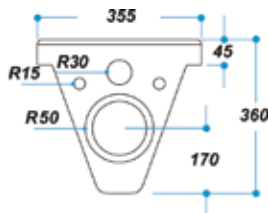

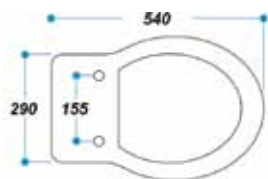

Low Level	Step-In
Falcon, page 48	Dove, page 72
Kestrel, page 56	Nightingale, page 72
Mallard, page 60	Dipper, page 76
Teal, page 60	Prinia, page 84
Wagtail, page 60	Linnet, page 120

Proudly Made in the UK

Wall hung WC. Plain white universal WC seat available on request. Seat dimensions: 400mm x 365mm wide. Reference: 04TS01

WC dimensions

## Combined Showering & WC

Wall hung WC supplied as standard when combining a shower and toilet facility. The hygienic wall mounting characteristics allow for easy cleaning underneath and around the toilet pan.

Adjustable WC frame allows the wall hung toilet to be set at a specific height, to suit almost any user.

Adjustable height WC frame dismisses the need for unpopular raised toilet seats or plinths. WC cupboard width of 350mm allows for cistern access.

Frame adjustable feet provide height variation of 0mm to 200mm. Cistern also incorporates a chrome dual flush plate.

Toilet cistern and frame are screened out of sight by a full height removable glazed panel.

Optional roof

Sanipro Macerator

Adjustable WC frame  
1120H x 500W x 160D

## Cubicle Options

Using an optional roof with your cubicle helps to retain steam or condensation and also provides a fixing point if you wish to use an optional light or fan.

A macerator can also be supplied which would locate within the cistern cupboard, see below.

A cubicle requires no tiling and can be used in any room with the minimum of installation and disruption to existing services, and can be easily relocated if required.
