

CONTOUR Dipper

Low entry & easy installation, only 90mm high

The Dipper step in shower tray is ideal when a low level showering solution is required to be sited on an unbreachable floor. The 1½” side outlet can be quickly connected to existing or new above ground pipework.

Benefits

An above ground tray that can be installed directly onto the existing floor, with the minimum amount of disruption to a property. The nature of the **90mm** high Dipper tray is ideal for use with a shower cubicle, which may require to be located within a bedroom or living area or for relocation in the future.

- Step in shower tray only **90mm** high
- Lifetime guarantee
- Reinforced GRP construction
- Anti-slip surface for an assured underfoot grip
- 1½” side outlet tray requires no floor excavation. Can be fitted on wooden or solid floors
- Hair trap reduces the possibility of blockages occurring
- Can be used with a running trap
- Manufactured in the UK
- Exclusively incorporates Microban® antibacterial protection
- Left or right hand available

Suitable for wooden floors

Suitable for screeded floors

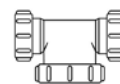

Suitable for unbreachable floors

Above ground tray

Only 90mm high

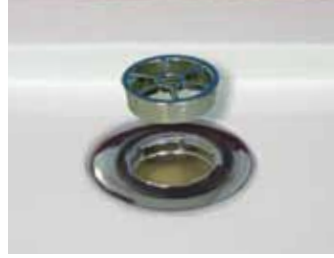

Suitable for gravity or pumped waste

Proudly Made in the UK

Easy to step in to, could be let into the floor if required

Hair trap

Installation

At **90mm** high, the easy to step into Dipper tray can be installed directly onto the floor without the need for any excavation under the tray, simply bed the tray down and connect pipework to the 1½" side outlet. Use a reducer to utilise a Dipper with existing pipework or if a shower drain pump is required.

The hair trap reduces the prospect of hair, soap and shower gels causing a blockage in the tray's outlet.

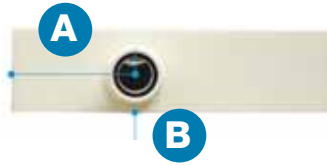

Waste Position

'A' = 130mm from the centre of the outlet to the outer edge of the tray.

'B' = 45mm from the centre of the outlet to the floor

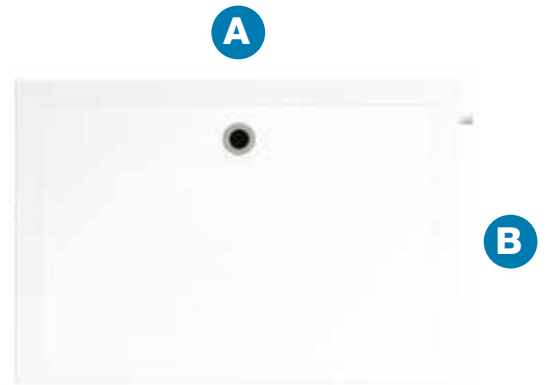

1½" side outlet
