

CONTOUR **Dove, Nightingale, & Nightingale02**

Above ground, side outlet, just 60mm high, ideal for unbreachable floors

An above ground range of shower trays that can be installed directly onto any floor type, even an unbreachable surface, with the minimum amount of disruption to a property. The side outlet removes the waste water from the shower tray without the need to excavate any of the existing flooring for drainage purposes. The 1½" side outlet can be quickly connected to existing or new pipework.

Advantages

Easy to step into at just 60mm high, this type of shower tray is quick and simple to install. The side outlet tray requires no floor disruption as the waste water is removed above ground level. The Nightingale02 has no tiling lip and can be used for corner access shower enclosures. Optional ramp available to assist wheelchair access.

- Step in shower tray only 60mm high
- Ramp R03 available on request as an optional accessory to assist wheelchair access, see page 115
- Lifetime guarantee
- Reinforced GRP construction
- Anti-slip surface for an assured underfoot grip
- Side outlet tray requires no floor excavation. Can be fitted on wooden or solid floors
- Hair trap
- Manufactured in the UK
- Exclusively incorporates Microban® antibacterial protection
- Left or right hand available
- Nightingale02 has no tiling lip and can be used for corner access enclosures.

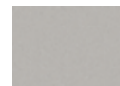

(All other tray properties are the same as the Nightingale)

Suitable for wooden floors

Suitable for screeded floors

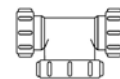

Suitable for unbreachable floors

Above ground tray

Only 60mm high

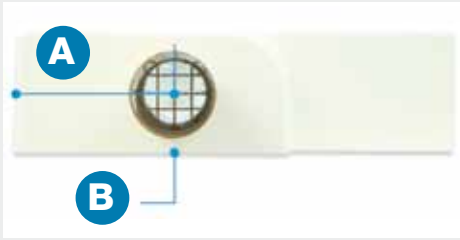

Suitable for gravity or pumped waste

Proudly Made in the UK

Easy to step in to, could be let into the floor if required

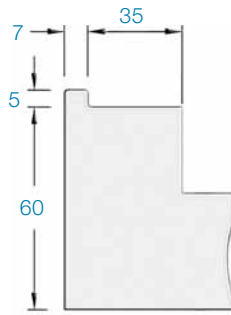

1 1/2" side outlet waste position

DOVE A RH illustrated
See following pages for more options

Optional ramp for wheelchair access

Tiling lip (Not Nightingale02)

Hair trap

Side Outlet

At **60mm** high, this easy to step into range of tray can be installed directly onto the floor without the need for any excavation under the tray, simply bed the tray down and connect pipework to the 1 1/2" side outlet. Use a reducer to utilise with existing pipework or if a shower drain pump is required.

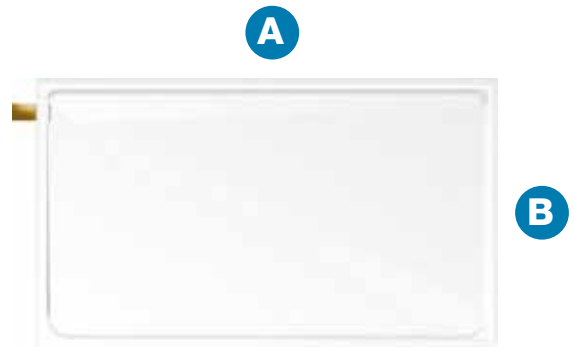

The hair trap reduces the prospect of hair, soap and shower gels causing a blockage in the tray's outlet.

The use of an optional ramp will allow for wheelchair access. See page 115 for more details.

Waste Position

'A' = 80mm from the centre of the outlet to the outer edge of the tray.

'B' = 35mm from the centre of the outlet to the floor

Tray Reference	Tray Size	
	A	B
DOVE	1200	700
