

CONTOUR Fluted Grabrails

Providing stability and confidence

The additional of a grabrail can offer the user the added reassurance and assistance they may need when using the shower area. Choose from a variety of affordable, durable and practical sizes, as well as colours to assist the visually impaired.

The BS8300:2001 recommendation for grabrail height from the floor in the design of buildings to meet the needs of disabled people are as follows: Diagonally (approx 15°) – Lowest end near the seat, 680mm from the floor.
Vertically: Between 800mm and 1300mm Horizontally: Between 1050mm and 1405mm

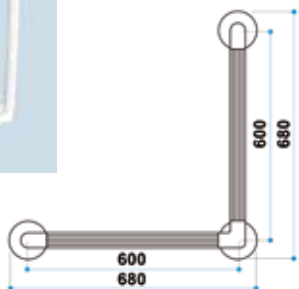

FLUTED GRABRAIL

- Fluted detail offers the user a positive grip in and around the shower area.
