Level access for wheelchair or the ambulant user

We understand that no two bathrooms are the same and this type of level access shower tray, which is available in six different sizes, offers a practical solution where restricted space or ease of accessibility is required. Providing complete floor level access with no ramps or steps to negotiate, ideal for the ambulant or wheelchair users.

Features

Can be installed within concrete or wooden floors. An area of approximately **40mm** in depth would need to be removed to accept the shower tray. If fitting in a wooden floor this would require some modification to the floor joists. Available with a variety of enclosure options to suit almost any requirement.

- Level access, assists effortless wheelchair entry
- 18mm tiling lip can accommodate wallboards. Also used to fix the shower tray to the wall
- Lower side walls for greater strength and stability
- Reinforced GRP construction
- Concealed wall fixing
- Suitable for wooden or solid floor situations. Requires floor excavation of approximately **40mm**
- Lifetime guarantee
- Anti-slip surface for an assured underfoot grip
- Centralised waste position, Merlin and Skylark only
- Service ducting available as an optional accessory to overcome pipework or to make the showering area larger, see page 116
- Manufactured in the UK
- Exclusively incorporates Microban® antibacterial protection
- Handed and non handed tray options available

Suitable for wooden floors

Suitable for screeded floors

Yes

Suitable for gravity waste

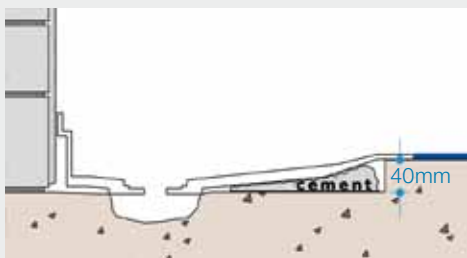

Suitable for pumped waste

Proudly Made in the UK

Low level access for those with mobility difficulties

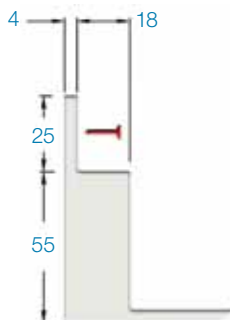

Void under the tray filled with a weak sand and cement mix

Tiling lip cross section

Wheelchair Access

This type of shower tray has been designed to provide unrestricted level access and easy wheelchair entry.

Incorporating an 18mm tiling lip for that leak proof finish, which will also accommodate wall boards if desired. The tiling lip is also used to secure the shower tray to the wall.

An area of approximately **40mm** minimum in depth must be removed to accept the shower tray. The void beneath the tray must be filled with a 'weak' sand and cement mix.

Service ducting available, on request, to overcome above ground pipework or to make the showering area larger. Creates a void approximately 75mm behind the shower tray, see page 116.

A

B

Tray Reference	Tray Size	
	A	B
SWAN	950	950
STOR	1050	1050
HARR	1050	750
SKYL*	1250	700
OSPR	1250	800
MERL*	1250	800

All tray's are handed, except SWAN & STOR

*Have a centralised waste position

Waste Options

Supplied as standard with a STW8B-95 50mm water seal gravity waste, see page 104 for more details. UPSW-3-22 available if using in a waste pump situation see page 105 for more details.
