

CONTOUR Cubicles

An enclosed showering area, easily fitted into almost any room

A shower cubicle is the simple option when a showering solution is required with the minimum amount of installation and disruption to existing services.

A cubicle can be located up or down stairs, and as full cubicles required no tiling, they can easily be relocated if required.

The addition of grabrails, shower seat or a wash hand basin will provide a functional solution for individual requirements.

- Provides a short term alternative, or ideal as an enclosed showering area
- Simple to install, shower tray and enclosure can be easily installed up or down stairs
- Full enclosure can be used in any room with the minimum amount of installation and disruption, and can be relocated if required
- Glazed with polypropylene. This material is white and indestructible, it exceeds any classification and is suitable for the most demanding situations
- Shower tray guaranteed for 25 years. Anti-slip surface provides an assured under foot grip
- Shower doors can be glazed in either styrene or polypropylene
- Cubicle height, 1850mm. Half height doors manufactured at 750mm as standard
- Shower trays featuring  antibacterial protection inhibit the growth of harmful and odour causing bacteria
- Left or right hand options available

Wall hung WC (seat not supplied as standard, see page 107)

WC dimensions

Adjustable WC frame

Combined Showering & WC

Villeroy & Boch wall hung WC supplied as standard when combining a shower and toilet facility. The hygienic wall mounting characteristics allow for easy cleaning underneath and around the toilet pan.

Adjustable WC frame allows the wall hung toilet to be set at a specific height, to suit almost any user.

Adjustable height WC frame dismisses the need for unpopular raised toilet seats or plinths. WC cupboard width of 350mm allows for cistern access.

Toilet cistern and frame are screened out of sight by a full height removable glazed panel.

Cubicle Options

Using an optional roof with your cubicle helps to retain steam or condensation and also provides a fixing point if you wish to use an optional light or fan.

A macerator can also be supplied which would locate within the cistern cupboard.

A cubicle requires no tiling and can be used in any room with the minimum of installation and disruption to existing services, and can be easily relocated if required.

A cubicle can be used on the following flat top tray's:

Low Level

- Falcon, page 42*
- Kestrel, page 48*
- Mallard, page 52*
- Teal, page 52*
- Wagtail, page 52*
- Cormorant, page 108*
- Bittern, page 108*
- Wren, page 111*

Step In

Alternatives

Full height enclosures provide more privacy when used within the bathroom and by other members of the family, or half glazed cubicles when assisted bathing is required.
