

# Curtains, Captive Curtain & Curtain Rails

## CURTAINS

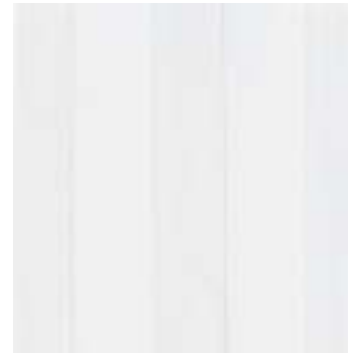

A white satin striped, weighted 4oz, polyester shower curtain supplied as standard with almost every shower enclosure in our range.

Using a curtain will help retain any over splashed water within the shower area

Available in five size options to suit almost any shower area. A 1400mm drop curtain can be used where a shower seat is sited, this will finish high enough to avoid the seats brackets.

By adding weight into the bottom seam of the curtain, this stops it from riding up whilst the shower is in use.

*Pattern sample illustrated right.*

WIDTH	DROP	REFERENCE
1800mm	1400mm	01SC05
1800mm	1800mm	01SC01
1800mm	2000mm	01SC02
2500mm	1800mm	01SC03
2500mm	2000mm	01SC04

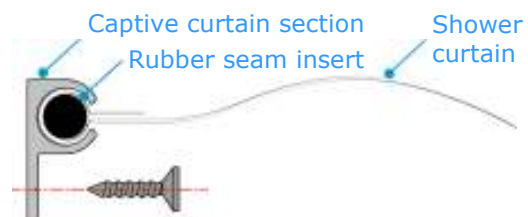

## CAPTIVE CURTAIN SYSTEM

The captive curtain system provides the user with confidence of the curtain staying in place. By adding a seam to one edge of the curtain it can be locked into position keeping all over sprayed water inside the showering area.

This can be especially advantageous in high use situations where the showering facilities are used a number of times per day. When drawing the shower curtain the remaining end tends to follow in the same direction as the user is pulling, leaving a potential gap for over sprayed water to leak through, see left.

If there is a window or vent that encroaches into the shower area the captive curtain system can be used to secure and overcome the problem.

	REFERENCE
Captive Curtain System, supplied with unit	01CC01
Captive Curtain System, supplied separately	01CC02

WIDTH	DROP	REFERENCE
1800mm	1800mm	01SC20
1800mm	2000mm	01SC21
2500mm	1800mm	01SC22

This practical system still allows the curtain to be removed for washing. Simply slide the curtain out of the captive section and remove the rubber seam insert, see above left.

Using the Captive Curtain system means that you will never be troubled with preventable water leaks via the shower curtain.

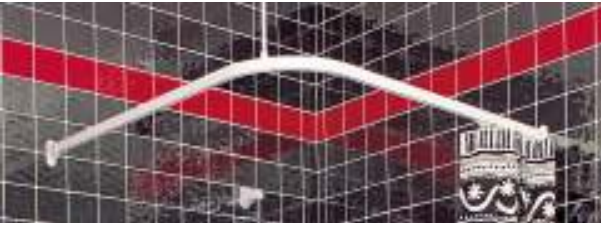

Curtain Rails are coated in a neutral white powder coating to compliment all of our shower enclosures. Apart from our standard sizes listed below, we can make a curtain rail to suit almost any practical size. Curtain rails are supplied with all the relevant fixings including, Wall Brackets, Hooks and Gliders for hanging your chosen curtain from and Ceiling Drop Rod Kit.

#### STRAIGHT RAIL *For shower areas between three walls*

SIZE	REFERENCE
1000mm	02S1000
1500mm	02S1500
2000mm	02S2000
2500mm	02S2500

#### 'L' SHAPED SQUARE RAIL *For corner shower areas*

SIZE	REFERENCE	
A	B	
900mm	900mm	02L9
1000mm	1000mm	02L10
1200mm	1200mm	02L12

#### 'L' SHAPED RECTANGULAR RAIL *For corner or larger shower areas*

SIZE	REFERENCE	
A	B	
750mm	1000mm	02L75X10
750mm	1200mm	02L75X12
750mm	1500mm	02L75X15
750mm	1800mm	02L75X18
900mm	1000mm	02L90X10
900mm	1200mm	02L90X12
900mm	1500mm	02L90X15
900mm	1800mm	02L90X18

#### 'U' SHAPED RAIL *If there is an obstruction in the shower area, for example a window*

'U' shaped curtain rails are made to order. Please state length A, B and C.

Total length **must not** exceed 4 metres. If an overlap is required, please send a sketch. Special sizes made to order.

SIZE	REFERENCE
A + B + C = 3 metres	02U3000
A + B + C = 4 metres	02U4000
