Warnings:

- Due to manufacturing telerances we do not recommend pre-drilling fixing holes before physically receiving this product.
- On receiving delivery of this product, a thorough check must be carried out and any defects immediately reported. The product must be stored in a dry place and not stacked under other equipment.
- The wall on which the rail is installed must be flat and capable of taking the load.
- Installation must be carried out by a qualified tradesman using suitable fixings for the wall substrate.
- Improper installation / use can cause accidents and injuries.
- Do not use countersunk fixings.

- Never after the fixing holes as this could affect the strength and integrity of the product.
- Do not over-tighten fixings.
- This rail has been tested with a static load of 160kg giving a max rated load of 107kg
- After installation a functional test must be carried out prior to use.
- These instructions should be retained by the user of the product for its whole life.
- This rail should not be subjected to impact.
- This rail is designed to offer support to the user and should not be used in a way that would apply the users' full weight to the rail.
- Do not use the grab rail for any purpose other than that for which it was designed.

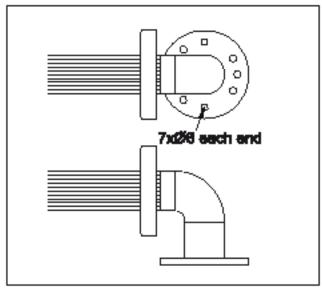

Installation:

installation should be carried out by a suitably qualified tradesmen using correct fixing for the wall substrate. No fixings are supplied with this product to allow the correct fixing method to be selected for the specific installation.

- 1) Once the correct wall fixing has been selected, at least 5 fixings should be employed in each end of the rail. There are 7 fixing holes to give more flexibility to the litter in the exact location of the fixing. Where possible the fixings should be evenly spaced but it is up to the fitter to select the correct fixing holes for the specific installation.
- 2) Release the flange cover off each end of the rail.
- Offer grab rail up to correct location on the wall with the fixing holes visible and carefully mark the selected hole locations.
- Drill the holes in the well of a diameter and depth recommended by supplies of well fixings.
- Crice screws are installed, clip the flange cover back over the flange.
- Always carry out a functional test after installation and report any issues immediately.
- Please leave these instructions with the user.

Note: Wings not included

Using this product:

ALWAYS check the grab rail is litted securely to the wall and shows no signs of wear or damage prior to use. Rease keep these instructions in a safe place for future use.

Cleaning and maintenance:

The grab rail must be checked regularly by qualified personnel to ensure that it is in perfect working order. This rail can be cleaned using only a very mild detergent. Do not use acidic, alkaline, chlorine based or abrasive cleaning materials.
