

UNIVERSAL TOILET PLINTHS

55mm, 75mm & 105mm

Description	Reference
55mm Plinth	26TP55U
75mm Plinth	26TP75U
105mm Plinth	26TP105U

FITTING INSTRUCTIONS

- Use to permanently raise virtually all WC pans by either 55mm, 75mm or 105mm.
- When the position for the WC has been decided, secure the plinth to the floor or shower tray by pilot drilling out the 4 indentations in the plinths flange, see **FIG 1**.
- Screw directly to the floor or tray using a suitable fixing. If securing to a concrete floor a suitable rawl plug would also be required.
- With the plinth securely in position, place the WC onto the top surface. Mark the position of the pan and pilot drill.
- Secure the WC pan in position using a suitable fixing.
- With the plinth and pan secured in place, apply a bead of silicone round the junction of the plinth with the floor and the WC pan with the plinth.
